RULES GOVERNING FLORAL ART

1. An **arrangement** consists of plant material only, arranged according to artistic principles, in a suitable container. Use of a separate base under the container is allowed. Accessories are not permitted.
2. A **composition** is an arrangement with one or more accessories. An accessory is anything used in creating an exhibit beyond the plant material, container and base. Background fabrics, figurines, ornaments and seashells are examples of items that may be used as accessories. An accessory is just that. It can be a subtle suggestion but should not be an overwhelming display of objects and should never detract from the main theme.
3. An **assemblage** is a “three-dimensional abstract design combining plant material and found objects into an integrated whole. An assemblage may have several parts or have parts fastened together into a single unit. It usually includes plant material and found objects which were previously unrelated. These objects and plant material are creatively related through form, colour and/or texture into a new identity having aesthetic unity. Man-made materials such as metal, plastic, wire, rope, etc... or natural materials like stone and wood may be used.” ***

For the purpose of this show, assemblages must be portable. Components should be on a backboard, panel, tray, etc... (Please note that the use of backboards, panels & trays does not automatically make an exhibit an assemblage. These components are often used as containers & bases.)

4. Exhibits in SECTION XII are to be comprised of fresh plant material however, untreated (no waxes, dyes, paint, etc...) but dried branches & vines, pine cones, seed pods and similar items may be used sparingly to complement the fresh material. The use of fruits & vegetables in floral art is always encouraged. If cut, exposed surfaces may be sealed with a chemical “sealer” to prevent attracting insects.
5. The plant material in SECTION XII does not have to be grown by the exhibitor. If you don't have what you need growing in your own garden, you may acquire material from friends and neighbours (after asking, of course) or collect material in the wild (no endangered species, please) or purchase material from a market, grocer or florist.

Class XII - FLORAL ART

SECTION

1. **Kitchen Edibles** - an arrangement including one or more edible flowers and herbs
2. **Flight of Fancy** - a composition using one or more artificial birds, butterflies or insects
3. **Foliage** - an arrangement using only foliage, no flowers
4. **Elegant Evening**- composition or arrangement
5. **Red & White Canada 150** - an arrangement using Red and White flowers with appropriate foliage
6. **Wild flower** arrangement
7. **Basket** arrangement (a basket being any container with a handle)
8. **Miniature**- an arrangement less than 6" in height and width
9. **Tea for Two** - a cup & saucer arrangement
10. **Cinderella** - an arrangement in a shoe or boot
11. **Table** arrangement
12. **Underwater**- arrangement of flowers and foliage under water (nothing showing above the water line).

FRUIT & VEGETABLES

The colour of the entries should be bright and attractive. They should be relatively free from blemishes and of good quality. Size should be moderate. They should be at a stage where they would be used to their best advantage... neither over ripe nor under ripe. In SECTIONes where multiple specimens are required, they should be as uniform as possible in colour, maturity, shape and size and displayed attractively on the plate.

Specimens may be washed with the exception of potatoes, which should be brushed. Fruit & vegetables should be displayed upon disposable plates. Items such as leaf lettuce & greens may be displayed upright in water to prevent wilting as their roots have been removed. Culinary herbs should be displayed in clear bottles.

Where the show schedule differs from generally accepted judging standards, the judges will **ALWAYS** follow the rules & regulations set out in the show schedule.

All exhibits must be grown by the exhibitor.
